#### 4. FIRST AID MEASURES

- 1) Following eye contact:
  - Flush eyes gently with water for at least 15 minutes while holding eyelids apart
  - Seek medical attention without delay; if pain persists or recurs seek medical attention.
  - If symptoms develop, immediately move individual away from exposure and into fresh air.
  - Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.
- 2) Following skin contact:
  - Immediately flush skin with plenty of soap and water for at least 15 minutes while removing contaminated clothing and shoes.
  - In case of burns, immediately cool affected skin for as long as possible with cold water.
  - Seek medical attention in event of irritation.
- 3) Following inhalation:
  - Remove from exposure to fresh air immediately.
  - Lay patient down. Keep warm and rested.
  - If not breathing, give artificial respiration.
  - If breathing is difficult, give oxygen.
  - Perform CPR if necessary.
  - Get medical attention immediately.
- 4) Following ingestion:
  - If swallowed do NOT induce vomiting.
  - If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.
  - Observe the patient carefully.
  - Never give liquid to a person showing signs of being sleepy or with reduced awareness; i.e. becoming unconscious.
  - Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink.
  - Possible aspiration hazard.
  - Get medical aid immediately
- 5) Advice to physician:
  - Any material aspirated during vomiting may produce lung injury. Therefore emesis should not be induced mechanically or pharmacologically. Mechanical means should be used if it is considered necessary to evacuate the stomach contents; these include gastric lavage after endotracheal intubation. If spontaneous vomiting has occurred after ingestion, the patient should be monitored for difficult breathing, as adverse effects of aspiration into the lungs may be delayed up to 48 hours.

- 3) Special protective equipment for firefighters:
  - Wear a self-contained breathing apparatus with a full facepiece operated in the positive pressure demand mode with appropriate turn-out gear and chemical resistant personal protective equipment.
  - Prevent, by any means available, spillage from entering drains or water course.
  - If safe, switch off electrical equipment until vapour fire hazard removed.
  - DO NOT approach containers suspected to be hot.
  - Cool fire exposed containers with water spray from a protected location.
  - If safe to do so, remove containers from path of fire.

## 6. ACCIDENTAL RELEASE MEASURES

- 1) Health considerations and protective equipment:
  - Avoid breathing vapours and contact with skin and eyes.
  - Control personal contact by using protective equipment.
  - Alert Fire Brigade and tell them location and nature of hazard.
  - Wear breathing apparatus plus protective gloves.
  - No smoking, naked lights or ignition sources.
  - Increase ventilation.
  - Use a spark-proof tool.
- 2) Environmental precautions:
  - Spillage from entering drains or water course.
  - If contamination of drains or waterways occurs, advise emergency services.
- 3) For cleaning up:
  - Clean up all spills immediately.
  - Contain and absorb spill with inert material (e.g. vermiculite, sand or earth)
  - Collect residues in a flammable waste container.
  - Water spray or fog may be used to disperse /absorb vapour.
  - Collect recoverable product into labelled containers for recycling.
  - Collect solid residues and seal in labelled drums for disposal.
